

**ISC 520J
TOPICS IN SCIENCE EDUCATION: EARTH SCIENCE BASICS**

2 graduate credits

October 16, 2010; 9:00 a.m. – 5:00 p.m.

Place: Detroit Children's Museum

Target Grades: K – 8

This course introduces individuals to the fundamentals of earth science. Participants will be shown how to teach about plate tectonics, rocks and minerals, landform formation, rock cycle and water cycle through hands-on inquiry-based activities. Participants will also receive additional resources to use with their students or group members. Participants will continue their study of Earth science online and learn how to integrate it into their curriculum.
